development of earth building

Virtual International Clayfest 2020

Friday 27th and Saturday 28th November 2020

Calling all Earth Building Professionals and Enthusiasts...

We invite you to this year's **Virtual** Clayfest, with talks and workshops from Academics, Professionals and Practitioners focusing on the following theme:

BUILDING SKILLS and BUILDING SKILLS

This theme includes exploring actual skills involved in earth building, how we can build and develop our own skills as professionals and how we spread our skills and teach others, particularly in the ever-growing digital world.

This is an exciting year for EBUKI, moving Clayfest online for the first time! This means we will have speakers and attendees from all over the globe and all presentations will be recorded and made available to all ticket holders.

**Tickets £35.00 –
